

ECON 5253 Problem Set 4

Ahmed Chaudhry

February 25, 2021

1 Question No. 7

I will be interested in scraping tweets from the official Twitter pages of the three major political parties in Pakistan pre and post elections period. I would then like to compare how these political parties were running their election campaign and what promises they made to how they actually allocated the budget once in power.

As for the answers are concerned:

Q5: The dataframe named "mydf" was of the type "tbl_df", "tbl", "data.frame"; and "mydf\$date" was of the type "character"

Q6: The dataframe named "df1" was of the type "tbl_df", "tbl", "data.frame"; and "df" was of the type "tbl_spark", "tbl_sql", "tbl_lazy", "tbl".
